Delegates to Pan-American Congress

Visit World's Fair City. ST. LOUIS, Oct. 13 .- The delegates to the congress of the American States which is to be held in the City of Mexico, who left | tem. Washington yesterday afternoon in a special train over the Pennsylvania road, arrived in this city at 7 o'clock to-night. They were met at East St. Louis by a reception committee composed of world's fair officials and escorted to this side of the river, where they were welcomed to St. Louis by Secretary Walter B. Stevens, of the World's Fair Company, and a number of directors of that organization. The delegates had a pleasant journey and were all enjoying good health. After spending an hour in conversation with the world's fair officials the special train was backed down into the railroad yards, where the delegates will spend the night. They will be the guests of the world's fair directors tomorrow. In the morning they will be taken in earriages to the Latin-American Club. From there they will go to the Merchants'

WHOLLY DUE TO THE ROADS BEING UNABLE TO FURNISH CARS.

Rumor that the Pennsylvania Has Secured Control of the Erie-Miscellaneous Railway News.

The train records show that there were received and forwarded at Indianapolis in the week ended Oct. 12 a total of 28,631 cars, 22,726 being loaded. While this is a slight decrease in loaded car movement as com- its composite train, a silver medal for coal pared with corresponding weeks of previous years, when size and present methods of loading cars are considered the exhibit of last week is highly favorable, and is the more favorable owing to the fact that the business moving is more profitable to the grain movement up to the usual October average. The fact is that with Indianapolis lines not in the last twenty-five years have they handled so little grain in October as thus far this month, and there are no indications of an increased tonnage of grain east bound, at least for the present, as 75 per cent, of the wheat, corn and oats now carried is local in character and is more profitable to the roads than would be the case if the grain went to the seaboard for export. Since Oct. 1 west-bound tonnage has fallen off, but is still heavier than in the first half of October last year. In local traffic the roads are realizing the best results, so miscellaneous is the business in character, this remark covering hard and soft coals, iron products, heavy groceries, produce, hay, straw, cerealine products, dressed meats, live stock, furniture, carriages, glass and stoneware, of which latter articles the gas belt manufactories are unusually heavy shippers. Commission houses are handling immense quantities, both in and outbound, of fruits and vegetables, and a visit to the city freight depots in the afternoon of any day will be a surprise, so large are the shipments of goods by the local wholesale houses and manufacturers located at Indianapolis. Pennsylvania and Erie.

The most interesting report, says the timore & Ohio, and that the Erie will be operated under the jurisdiction of the Pennsylvania. The Post says: "The Pennsylvania has already arranged a traffic agreement with the Erie for St. Louis, Cincinnati and Louisville business to be carried Erie as a direct line between St. Louis, Cincinnati and Buffalo. They will obtain possession of the most important of terminals. At New Castle, Youngstown, Sharon, Dunkirk, Cleveland, Buffalo, Elmira, New York, Chicago, Akron and a dozen other places they will have a monopoly of the freight and passenger terminals. They can establish a direct service between Pittsburg and Cleveland through the populous Beaver and Mahoning valleys via New Castle and Youngstown, and will control the great coal fields reached by the Erie connections. It the Pennsylvania-Erie deal is effected it will enable the B. & O. to arrange to run passenger trains direct from Youngstown to Cleveland, and will give the Pennsylvania a short and direct line between Buffalo and Chicago via Youngstown and a short line from Cleveland to Chicago. Local LOANS-Money on mortgages. C. F. There is no longer any question as to the Wabash being in earnest in securing entrance to Pittsburg. The company has 500 men at work, and is making rapid progress between the Chartiers valley and Pittsburg. Night and day forces are worked, and the most improved modern machinery is used. Marquis Ito insists on paying his railroad fare as he goes over this country in spite of the action of the various roads offering to consider him a guest. He was surprised when the Great Northern officials refused his money for the trip from Seattle to St. Paul, and the Chicago, Milwaukee & St. Paul extended the same courtesy, but the marquis insisted on paying fare for him-

self and his party. The latest rumor is that President Unthe Hill people to look after the Northwestern lines, and that Charles M. Hays, who has just retired from the presidency of the Southern Pacific, will succeed Mr. Underwood on the Erie. This prediction is probably based upon the belief that Mr. Hays is too good a man for Mr. Morgan to allow depot and bulk-track facilities there is not him to escape his grasp. an Indianapolis line that is not now

Within the last twelve years five vice presidents of the Pennsylvania lines west of Pittsburg have died, and in nearly every case their illness was brought on by overwork. The first was T. D. Messler, then William Thaw, followed by J. N. McCullough and John E. Davidson, and last week Brooks, James McCrea, first vice president, now ranks as the older of the vice presidents on Western lines, the others, practically speaking, being young men.

H. C. Townsend, general passenger agent of the Missouri Pacific, is said to be the most probable candidate for world's fair manager in St. Louis, in 1903. Mr. Townsend is one of the representative men at St. Louis, and has numerous friends in all parts of the country, who will be glad to see his ability thus recognized. Mr. Townsend has remembered his most intimate friends in a recent artistic advertising arrangement in the form of a screen, which is something that will adorn any office and will be preserved as a souvenir.

The Chicago, Burlington & Quincy and the Union Pacific have of late been conducting some interesting experiments to secure photographic pictures of trains in rapid motion. The flight of a Burlington train was caught by an automatic appliance operated by electricity, put in motion by the engine coming in contact with the wire while the Union Pacific overland was paced by another train, and the picture taken while both were under speed at seventy miles an hour. This unique piece of photography was effected on a stretch of ouble track ten miles in length.

Railroad circles in northeastern Indiana and Chicago were surprised to learn of the appointment of Clinton H. Walton as general agent of the Pennsylvania road with office at this point. Mr. Walton about a year ago laid down his arduous duties as superintendent of the Pennsylvania terminal division at Chicago, which he had organized. His health had given out for second time, and he spent the winter in California, with his family. Improving somewhat, he returned to his home here, but was warned by his physicians not to resume his former work or he would soon collapse completely. The company therefore instated him in the agency here, where the work is lighter. Mr. Walton was for many years superintendent of the Logans-

port division. FROM SUNDAY'S JOURNAL.

WEEK WAS VERY ACTIVE

STEADY TONE TO PRICES.

Saturday's Rains Operated as a Slight Check-Decline in Linseed Oil-The Grain Markets.

While the heavy rains of Saturday curtailed trade considerably, the business of the week ended Oct. 12 was like the preceding weekhighly satisfactory in volume. Very seldom is a wholesale merchant heard to speak of business as being unsatisfactory. If any complaint is made it is on the close margains at which many goods are sold, leaving but small profits to the dealers. In the dry goods market it was an active week, the advance in prices in several lines of goods on Tuesday tending to improve trade. Wholesale process had a busy week. The movers. The flour market is moderately active, for the time being at least, the report that quotations holding their own. So far as the refunding of C., H. & D. and the real factor in the situation. Jobbers report continued strong conditions in canned goods, esbranch bonds is concerned it is not a new pecially tomatoes. Corn is quiet but steady. It is admitted by packers that this year's corn ouptut has been about an average one, although below the abnormal production of 1900, but those best informed predict that present prices are likely to continue and look for a steady market, expressing the opinion that higher prices need not be anticipated. In oried fruits there is an average movement, but not an active demand. In Irish potatoes the situation is stronger than week ago and highest quotations do not more than cover the market on good stock. Apples are steady, with good fruit in active call. There is an oversupply of 1-ars. All kinds of vegetables are in good supply and the demand is rather slow at unchanged praces. Concord and Dela ware grapes are in large supply. In tropical fruits during the week there were no changes of importance, except on lemons, which advanced o cents a box. Both poultry and butter are in better supply, with a tendency to lower prices, while eggs are holding steady at quotations, which are high for this season of the year Still, as all storage eggs have been prezty well terwood, of the Erie, is really to go with cleared out, the present prices, if not higher, are likely to prevail. Cheese is a good mover and dealers predict there will be advances before the end of this month. Provisions, in a domestic easier tone on most descriptions of hog products The week closed with a strong tone to the hide and leather markets and further advances are predicted.
